

SEPTEMBER: PROJECT SPOTLIGHT

PECO ENERGY EXECUTIVE FLOOR - PHILADELPHIA, PA

- 13,000 SF
- Corporate Renovation
- Programming, Planning, Design, Documentation, Project Management

The executive floor in the Main Office Building of PECO's headquarters was renovated to develop and reinforce their corporate image. The existing space was analyzed and new architectural elements were introduced to enhance the overall layout of the floor. This project was designed while working on LEED-EBOM certification for their 910,000 SF headquarters site.

New architectural finishes and furniture were selected for the 20-year-old space to create a clean, refined and sophisticated corporate environment. A rare Daniel Garber painting in the executive lobby, which was cleaned and restored by The Pennsylvania Art Conservatory, was the inspiration for our design concept. The color scheme of this magnificent painting was integrated in the design of the space through texture, architectural finishes, and furniture.

IEI GROUP | IEI ARCHITECTS
